

It is my pleasure to stand for re-election to the Exeter City Supporters' Trust in 2026. Over the past year or so it has been a privilege to serve on the Board and I hope through my contributions I have helped play my own part in delivering real change during a challenging time for both Trust and Football Club.

I have acted as Communications Working Group Chair; leading this important sub group. I have overseen the launch of the brand new Trust Board website, worked closely with colleagues on the Trust Board and at the Club to develop and deliver a more structured approach to Trust communications including regular newsletters and website articles. Its also been important to me that the Trust has taken steps to professionalise and sharpen its engagement with members at Board Meetings, I identified and have helped implement a number of key changes in this respect though I acknowledge there is considerable work remaining to embed these changes.

Beyond my role as Comms Lead I have actively contributed to the development of the new Trust Strategy, helping shape both the overall vision and the supporting actions and activities that will help to deliver it. I have also supported both Club and Trust on strategic development and planning matters relating to both St James Park and the Cliff Hill Training Ground utilising my professional expertise as a senior town planning practitioner. I have contributed positively at Trust Board meetings and been an active, visible Trustee around the Club and on representing the Trust in strategic meetings with local councils.

I have really enjoyed working alongside Trust Board colleagues over the last year, collectively we have made considerable improvements and crucially helped both Trust and Club recover after a turbulent 18 months or so. If re-elected I will continue to champion for improved communication, openness, and transparency wherever possible and of course making sure that having worked so hard to reset and establish a new vision and strategy, that it is delivered.
